

Independent E-Gaming Platform

Play'n GO independent E-gaming Platform – EGP delivered with a complete and comprehensive back-office gives operators a unique foundation to tailor their offerings. Play'n GO's EGP is built on a truly modular and open architecture that allows for easy integration of 3rd party products. It enables operators to become truly independent and flexible in selecting what games to offer and what business partners to work with.

More than 14 years of experience from developing online gaming systems combined with the use of the latest available technology ensure that our E-gaming platform constitute a solid foundation for a successful gaming operation. Trust Play'n GO's independent E-Gaming Platform for smart, speedy solutions that constitute strong, steady online gaming operations. We ensure that you are equipped with superior back-office administration tools for surveillance & marketing in addition to premium gaming content that fun-seeking players can enjoy virtually anywhere

Regulated Markets

Our EGP makes it easy for any operator to adapt to specific requirements and regulations applied in a regulated market. Recently we have provided our platform to operators with a license in the newly regulated Danish market.

GAT keeps you In Control

Any successful gaming operation needs a strong and steady back office. Our Gaming Administration Toolkit – GAT, forms an integral part of our EGP. It allows you to control and actively manage your operation in real time. Interoperability with your existing systems means you are not compelled to alter your entire back-office structure - GAT can be used as the main system as well as a sub system. It's your choice.

Manage a heterogeneous operation based on components supplied by Play'n GO and/or from other vendors.
