## Play'n GO Launches World's First Multiplayer Casino Network

Play'n GO proudly announces the launch of the **world's first multiplayer casino network**, which allows operators to cooperate with each other to enjoy the lucrative benefits of instant and continuous player liquidity. The multiplayer casino network, powered by the reliable instant-play game software developed by Play'n GO, can be integrated with an operator's existing online business. Players who originate from many different sites can be directed to the multiplayer casino network to play roulette, blackjack, mini baccarat and craps for real winnings in cash games and tournaments as they share the excitement with each other. Players can easily locate their online friends through the community guestbook to join them. Customers can purchase chips in different currency and chat freely at tables, which can be offered in multiple languages and which can seat a large number of concurrent players.

Play'n GO welcomes you to contact Magnus Lindberg, Play'n GO Sales Director, if you are interested in arranging a personal meeting to learn more about the exclusive opportunities offered by becoming a member of Play'n GO's new multiplayer casino network. Magnus will be available at the EiG Expo in Copenhagen on September 15-17, 2009.

### About Play'n GO
